TROPICAL CYCLONE BULLETIN NR. 8
Severe Tropical Storm OPONG (BUALOI)

Issued at 8:00 AM, 25 September 2025
Valid for broadcast until the next bulletin at 11:00 AM today.

SEVERE TROPICAL STORM OPONG MAINTAINS ITS STRENGTH WHILE OVER THE PHILIPPINE SEA.

Location of Center (7:00 AM)

The center of Severe Tropical Storm OPONG was estimated based on all available data at **365 km East of Guiuan, Eastern Samar (10.9°N, 129.1°E).**

Intensity

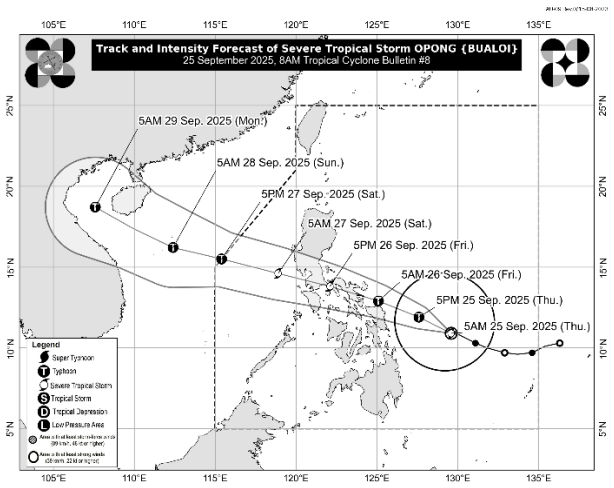

Maximum sustained winds of **110 km/h** near the center, gustiness of up to **135 km/h**, and central pressure of **980 hPa**

Present Movement

West northwestward at 20 km/h

Extent of Tropical Cyclone Winds

Strong to storm-force winds extend outwards up to **450 km** from the center

TRACK AND INTENSITY FORECAST

Date and Time	Center Position			Intensity		Movement dir. and speed (km/h)

TROPICAL CYCLONE BULLETIN NR. 8
Severe Tropical Storm OPONG (BUALOI)
Issued at 8:00 AM, 25 September 2025
Valid for broadcast until the next bulletin at 11:00 AM today.

OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to Weather Advisory No. 23 issued at 5:00 AM today for the heavy rainfall outlook due to Tropical Cyclone OPONG and the Southwest Monsoon.

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Minor to moderate impacts** from gale-force winds are possible within any of the areas under Wind Signal No. 2.
- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

The highest Wind Signal that may be hoisted throughout the passage of OPONG is Wind Signal No. 4.

The Southwest Monsoon, both enhanced by NANDO and OPONG, will bring **strong to gale-force gusts** over the following areas (especially in coastal and upland areas exposed to winds):

- **Today:** Ilocos Region, Batanes, Cagayan including Babuyan Islands, Isabela, Zambales, Bataan, Palawan, Visayas (areas not under Wind Signal), Zamboanga del Norte, Misamis Occidental, Misamis Oriental, Camiguin, Caraga (areas not under Wind Signal), Davao del Sur, and Davao Oriental.
- **Tomorrow (26 September):** Batanes, Cagayan including Babuyan Islands, Ilocos Norte, Ilocos Sur, Zamboanga del Norte, Palawan, Visayas (areas not under Wind Signal), Northern Mindanao, Caraga, Davao del Sur, and Davao Oriental.
- **Saturday (27 September):** Batanes, Cagayan including Babuyan Islands, Apayao, Abra, Kalinga, and Ilocos Region.

TROPICAL CYCLONE BULLETIN NR. 8
Severe Tropical Storm OPONG (BUALOI)
Issued at 8:00 AM, 25 September 2025
Valid for broadcast until the next bulletin at 11:00 AM today.

HAZARDS AFFECTING COASTAL WATERS

Gale Warning will likely be issued today (25 September).

24-Hour Sea Condition Outlook

Up to very rough, high, or very high over the following coastal waters:

- **Up to 11.0 m:** The seaboards of Catanduanes; the eastern seaboards of Albay and Sorsogon; the northern and eastern seaboards of Northern Samar.
- **Up to 5.0 m:** The northern seaboards of Camarines Norte and Camarines Sur.
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- **Up to 4.0 m:** The northeastern seaboard of Eastern Samar.
- **Up to 3.5 m**: The remaining seaboard of Eastern Samar; the eastern seaboards of Cagayan, Isabela, Aurora, Dinagat Islands and Siargao Islands; the northern and eastern seaboards of Polillo Islands.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.**

Up to moderate seas over the following coastal waters:

- **Up to 2.5 m:** The seaboards of Batanes and Babuyan Islands; the northeastern seaboard of Ilocos Norte.
- **Mariners of motorbancas and similarly-sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

Coastal Inundation

There is a **moderate to high risk of life-threatening storm surge** with peak heights reaching **1.0 to 3.0 m** within 36 hours over the low-lying or exposed coastal localities of Aurora, Zambales, Bataan, Metro Manila, CALABARZON, Occidental Mindoro including Lubang Island, Oriental Mindoro, Marinduque, Romblon, Bicol Region, Northern Samar, Eastern Samar, Samar, Biliran and Leyte. **Refer to Storm Surge Warning No. 4 issued at 5:00 AM today for the details.**

TRACK AND INTENSITY OUTLOOK

- **It must be emphasized that heavy rainfall, severe winds, and storm surge may still be experienced in localities outside the landfall point and the forecast confidence cone. Refer to the hoisted Wind Signals (for direct wind threat of the tropical cyclone) and "Other Hazards affecting Land Areas" for more details. Furthermore, the track may still shift more to the north or to the south but within the limit of the forecast confidence cone.**
- OPONG will continue moving west northwestward while approaching Eastern Visayas – Southern Luzon area. On the forecast track, it may pass close to Northern Samar or may make landfall over Bicol Region by tomorrow (26 September) morning or early afternoon and cross Southern Luzon throughout Friday. Afterwards, OPONG will emerge over the West Philippine Sea and exit the Philippine Area of Responsibility on Saturday (27 September) afternoon or evening.
- OPONG will continue to intensify while over the Philippine Sea and may reach typhoon category before making landfall over Bicol Region. It will then weaken as it crosses the archipelago, although it will likely remain as a typhoon or severe tropical storm during the passage. Re-intensification is highly likely once OPONG emerges over the West Philippine Sea.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 AM today.
